

Accredited Continuing Education Classes

Dunbar Water is a Community Adult Education Provider. Our Adult Continuing Education class earns licensed participants 3 credit hours, accredited through the Maine State Real Estate Commission - Office of Professional and Occupational Regulation. The information below is covered in detail with plenty of time for questions from your trusted Water Quality Advisors.

CEU Class Overview:

- Water chemistry – what's in your water, geological impacts, and understanding change to groundwater conditions
- In-home factors that affect water quality such as lead plumbing, well pumps, and pressure tanks
- Understanding laboratory test results and regular testing recommendations
- Signs and solutions for water hardness and low/high pH levels that impact appliances
- Learn how radon can enter a home's water supply and radon mitigation techniques
- Causes and solutions for water quality issues such as:
 - Odor
 - Staining
 - Poor taste
 - Contamination
 - Primary health concerns
- Methods of correcting utility and drinking water concerns
- Visual examples provided during each section
